

OPEN POSITION

Applications Engineer ***Sencorp, Ceratek & Cerapak***

SencorpWhite is looking for a full-time Applications Engineer. This engineer will be responsible for providing costing and lead-time to sales for RFQ's. Interface with sales and customers to refine customer requirements. Interface with assembly, machine shop, production control and purchasing to provide accurate delivery time and cost.

SencorpWhite Applications Engineers are expected to:

- Prepare outline for quotations to sales.
- Prepare CAD drawings for proposals.
- Review and refine customer requirements.
- Develop project budget working with sales, engineering and shipping.
- Develop machine costs working with production control, assembly and purchasing.
- Develop machine design and build timing working with engineering, production scheduling, purchasing, machine shop and assembly.
- Participate in project launch to transfer information to project manager/team and be available as a resource throughout the project duration as required.
- Interface with 3rd party suppliers for installation, peripheral equipment, etc.
- Travel to customer up to 25%, some international travel may be required.

In order to be successful in this position, you will need to meet the following requirements:

- Engineering degree or equivalent experience.
- 10 years manufacturing experience to include costing, assembly and machine shop.
- Budget and costing experience.
- Customer interface skills including preparing and presenting proposals, quotations and defining statements of work.
- Third party equipment and installation coordination.
- 3D solid modeling experience.
- Experience designing, quoting or selling standard and custom machinery.
- Conversant with power and controls architecture.
- Manufacturing or design experience with automated thermoforming, sealing and automated inventory system is highly desirable.

To apply please email resume to jobs@sencorpwhite.com.
